

TREVANION DAFFODILS SEED LIST 2019/20

Open Pollinated Seed

N. miniatus

The nicest N. miniatus are Harold Koopowitz's SFR (small, flat, round) collection. These miniatus seeds are NOT from Harold's collection but Harold's collection was growing nearby.

Notes

Price AUD\$
\$5

Open Pollinated Seed Tazettas

The mixed seed collections give good genetic diversity and a variety of forms, size and flowering time from autumn into winter. The Autumn Colors+ includes hybrids with my Bairns Sol. The ~8Y-Y means approximately. It is difficult to obtain a uniform 8Y-Y. The best is probably Goldate and it is one of the 4 parents of this seed.

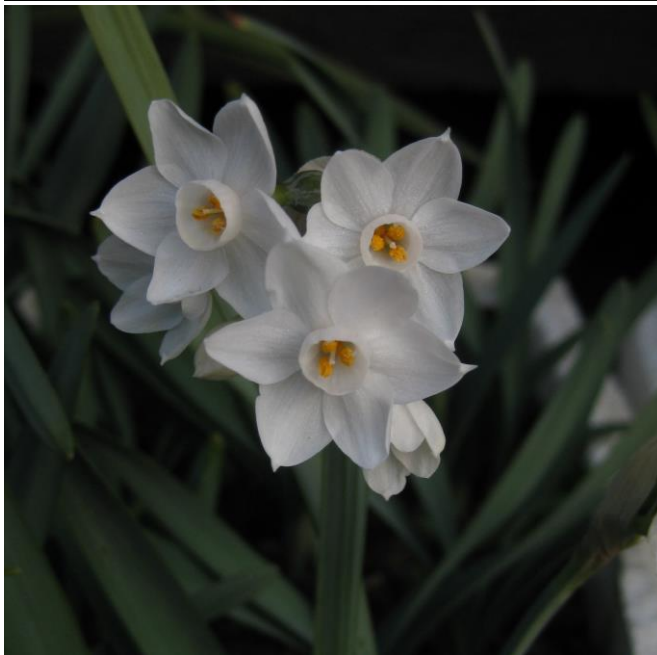

Seedlings
March 2020

Seed parent	Seeds	Notes	Price AUD\$
Gold Stanza	20		\$10
Small 8W-O	20	3 parents	\$10
N. elegans x Union Road	20	several siblings	\$5
8W-Y N. elegans hybrids	20	3 parents	\$10
8W-O N. elegans hybrids	60	14 parents	\$30
8Y-O N. elegans hybrids	60	13 parents	\$30
8W-Y 8W-O Autumn Colors	20	3 parents	\$5
8Y-O Autumn Colors+	40	8 parents	\$10
~8Y-Y Autumn Colors+	20	4 parents	\$5

Open Pollinated Seed Paperwhites

10_01 is a dwarf early paperwhite of exceptional form.

The Pearl type flowers are Mornington, a triploid that breeds mostly as an ordinary paperwhite. The hybrids are more robust than pachybolbus and the flowers are larger.

Seed parent	Seeds	Notes	Price AUD\$
10_01W N.pannizianus	20		\$10
Pearl type x N.pachybolbus	20	6 parents, diploid paperwhites	\$15

Open Pollinated Early Jonquilla

This is a group of exceptionally early jonquils that includes Subtle Satin and 11_01J, which will probably be named.

Subtle Satin

Seed parent
7Y-Y jonquilla

Seeds **Notes**
30 6 parents

Price AUD\$
\$15

Open Pollinated Seed Intersectional Jonquil/Viridiflorus Hybrids

The Hillstar group includes Hillstar, Quick Step, Limequilla and Gertrude Nethercote. This group flower in spring, some quite late.

(08_12MJ)

The Viriquilla Virivest group are hybrids between the Hillstar group and the viridiflorus hybrids Emerald Sea and Virivest and 03_19MJ. There is likely also to be some contribution from *N. fernandesii* hybrids. The flowering times can be scattered from autumn to spring.

(Viriquilla)

Seed parent	Seeds	Notes	Price AUD\$
Reverse bicolors Hillstar group - spring	20	2 parents	\$5
Reverse bicolors Viriverse group - winter	30	3 parents	\$15
White perianths Viriquilla Virivest group	60	11 parents	\$30
Yellow perianths Viriquilla Virivest group	30	4 parents	\$15

Open Pollinated Seed Bulbocodium Hybrids

(June 2019)

The mixed parent collections will have a wide range of forms and flowering times. They are from selections possibly from as far back as 2004 to as recently as 2017. They are great value for growers who are comfortable growing daffodils from seed. Being open pollinated and of diverse parentage it is unlikely all seeds will flower the same color as the parents.

Seed parent	Seeds	Notes	Price AUD\$
Gaggle Qua	20		\$5
Muvmuv	20		\$5
Wubwub	20		\$5
Frilled bulbocodiums	30	4 parents	\$10
Reversish bulbocodiums	30	8 parents	\$15
Pale yellow bulbocodiums	40	11 parents	\$15
White whitish bulbocodiums	50	15 parents	\$20
Yellow winter bulbocodiums	80	20 parents	\$25
Yellow spring bulbocodiums	50	16 parents	\$20

Open Pollinated Seed Intersectional Bulbocodium Hybrids

(Gold Step)

These are mostly spring flowering yellows. Most will probably have at least some ongoing fertility. Some will look very like pure bulbocodiums even though the maternal line is from Alfriston 2Y-R (seed parent of Gold Step).

Seed parent	Seeds	Notes	Price AUD\$
Gold Step seedlings	60	25 parents	\$60

PAYMENT

Payment by PayPal. Direct transfer is available. Please arrange by email: - info@trevaniondaffodils.com.au

All prices are in Australian dollars.

Post and packaging \$5.

Please ensure it is legal to have seeds sent to you. The current decline in international transport may affect delivery.
